

# Your safety matters to us.

## **The health and safety of our Residents and Staff at ParkVue at Livingston always comes first.**

The Coronavirus (COVID-19) has impacted all of us in ways we have never expected. ParkVue is closely monitoring guidance from the Centers for Disease Control (CDC), the New Jersey Department of Health and other governmental agencies to provide us with information to create procedures to safeguard the well-being of our Residents and Staff. To that end, our response to COVID-19 had been including, but not limited to, the following:

- Requiring face coverings in all common areas. Staff are required to wear face coverings anywhere they may interact with others.
- Increasing our enhanced cleaning and disinfection of our common areas, especially high-touch surfaces.
- Limiting direct contact to our Staff and providing alternate communication portals by telephone, email, and the Resident Portal.
- Promoting responsible personal hygiene practices in common areas including proper handwashing and covering coughs and sneezes and providing hand sanitizer dispensers throughout the community.
- Providing contactless leasing using electronic signing of many documents and online payments.
- Requiring daily screenings of Staff and Vendors when they arrive at the community.
- Enhanced air filtration throughout the Buildings.
- Providing contactless package pickup through our parcel locker system.
- Establishing safe practices for use of our amenities.
